I Mass. 29.

Bloomington Ind.

Dear Sir.

Since the destruction of the State University building by fire I have heard various rumors of the removal of the institution.

Have you considered the effect of its removal to this City and are you in favor of it provided suitable inducement was offered?

Such a move would undoubtedly more than double the patronage and give the University a wider influence and opportunity.

My object in addressing you is to learn whether a movement by influential parties to place the institution here would have your hearty cooperation.

Yours Truly,

E. C. Atkins.
