

Bloomington, Ind., April 15, 1893.

Mr. Geo. L. Roberts:

My dear Sir:-

I have your letter of April 3, and owing to absence it has not been answered sooner. Your letter has recalled clearly to me the facts upon which I had already decided the case. These facts I will have filed in the office and at the same time send you this statement. I consider that your work has entitled you fully to sixteen or eighteen of our credits. I also think that if you can make the equivalent to a year in German, that you would be able after that to complete our course in a year of work by making twelve credits that year. I am glad to make this statement and I can assure you that Prof. Swain will do what he can in carrying out any old plans. With wishes for your success in this matter, I remain,

Yours sincerely

John M. Coulter
